PROFESSIONAL SUMMARY

Highly Experienced Information Systems Manager with two decades of experience overseeing enterprise IT infrastructure, cybersecurity operations, and cloud transformation across hybrid and remote environments. Directed multi-site Microsoft 365 migrations impacting over 1,000 users, improving productivity by 32% and achieving a 91% Secure Score through robust implementation of Sentinel and Defender solutions. Led high-performance IT teams, optimizing ticket resolution processes to reduce case handling times by 28% and enhance SLA compliance. Bringing advanced expertise in identity protection, TLS/SSL, DNS, and compliance frameworks. Adept at aligning information systems with organizational objectives to strengthen business continuity, streamline workflows, and mitigate operational risks. Ready to leverage this leadership and technical acumen in an Information Systems Management role within a growth-oriented, technology-driven enterprise.

SKILLS

Information Management, Cybersecurity Management, Microsoft 365 Administration, Azure Management, Identity Protection, Endpoint Security, Threat Detection, Incident Response, Data Governance, IT Infrastructure, System Integration, Server Virtualization, Compliance Auditing, Risk Mitigation, Disaster Recovery, Project Management, Process Automation, Performance Monitoring, Change Management, Policy Development, SLA Management, Technical Support.

EXPERIENCE

M365 Admin Support Queue Manager | Upwork | Remote | Mar 2024 – Jul 2025

Roles and Responsibilities:

- Streamlined global case triage workflows by collaborating with Business Assist Operations Leads, reducing average resolution times and improving SLA compliance across distributed support teams.
- Optimized ticket assignment processes using workload analytics, boosting operational efficiency by 22% and raising client satisfaction scores to 91%.
- Monitored team performance through dashboards and reporting tools, enabling proactive interventions that increased overall queue throughput and reduced bottlenecks.
- Coordinated remote collaboration with leads and support ambassadors via Microsoft Teams and ServiceNow, ensuring seamless management of 200+ active cases weekly.
- Standardized and enriched knowledge base documentation for recurring technical issues, reducing case reassignments and improving first-contact resolution rates.
- Developed real-time KPI tracking dashboards for SLA adherence, enhancing executive visibility and data-driven decision-making.
- Delivered virtual training and mentoring for support ambassadors, reinforcing escalation procedures and technical proficiency, resulting in faster issue resolution.

ICT Officer | Geothermal Development Company | Nairobi, Kenya | Jul 2013 – May 2024

Roles and Responsibilities:

- Led migration of 1,000+ enterprise users to Microsoft 365, planning and executing onboarding, training, and technical support, which improved collaboration efficiency and minimized downtime during the transition.
- Deployed Microsoft Sentinel and Defender to strengthen cybersecurity posture, reducing security incidents and achieving a 91% Secure Score across all endpoints.
- Conducted comprehensive security and compliance training for IT service desk teams, reducing triage times by 21% and improving adherence to organizational and regulatory standards.
- Delivered Tier 2/3 technical support for critical escalations, resolving complex issues with 94% accuracy and ensuring uninterrupted business operations.
- Deployed Microsoft Intune to enforce endpoint security for 500+ devices, implementing conditional access, encryption, and compliance policies.
- Collaborated remotely with vendors, Microsoft engineers, and cross-functional teams to troubleshoot complex issues and deploy system upgrades without impacting operations.
- Automated identity provisioning and reporting workflows, reducing manual administrative workload by 11% and increasing operational efficiency.

Team Leader - Managed Desktop Services | Barclays Bank of Kenya | Nairobi, Kenya | Apr 2010 – Jul 2013

Roles and Responsibilities:

- Directed desktop and server support teams handling over 100 daily tickets, introducing proactive maintenance processes and workflow improvements that reduced backlog by 16% and increased system availability.
- Established structured escalation paths and detailed documentation, enabling faster resolution of complex issues and reducing average resolution times while improving SLA compliance.
- Mentored and coached a team of 12 IT engineers, implementing continuous development programs that improved technical competency and raised customer satisfaction by 21% year-over-year.
- Oversaw deployment of Windows updates and enterprise system upgrades with 99.8% endpoint compliance, minimizing business disruption and ensuring operational continuity.
- Managed remote troubleshooting operations for multi-branch locations, ensuring rapid resolution of infrastructure and desktop issues without on-site visits.
- Introduced preventive maintenance schedules and process optimization initiatives that reduced user downtime by 18%, increasing productivity and reducing repeat incidents.
- Conducted ITIL-based service delivery audits and performance reviews, establishing best practices that strengthened accountability and team performance.

OTHER EXPERIENCES

- **Systems Administrator – Managed Desktop Services** | Barclays Bank of Kenya | Nairobi, Kenya | Apr 2008 – Mar 2010
- **Technical Support Specialist** | Paetec Communications, Inc. | Rochester, NY | Sep 2004 – May 2007
